

Sec. 137. 1:

Request Revision.

This section has to do with the registration and tracking of medical marijuana recommendations by attending physicians.

We suggest that language be amended to omit 57(e) 2 and 3.
57(e) 4 is sufficient protection of public safety.

Sec. 35.1(a):

Request Revision.

This section refers to the surrender and reapplication of medical marijuana certificates. Specifically when a change in ownership or change in location is desired.

We recommend omitting this section. Section 35.1 is, by nature, detrimental to the success of the medical marijuana industry in Nevada.

Language is suggested to require potential new owner(s) to qualify for a medical marijuana establishment agent card and vetting process through the application process. If the prospective owner does not qualify for a MMEA card then ownership of a MME will not be possible.

Sec. 35.1(b):

Revision Requested.

The (b) side of Sec. 35.1 requires medical marijuana establishments to surrender and reapply any time there is a change in location.

We suggest that (1) and (2) of subsection (b) be omitted in its entirety and replace them with language that requires an approval letter regarding the new location from the local government.
